***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on July 6, 2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Claim Rejections - 35 USC § 102***

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Shimomura (20020049546). In regard to claim 1, Shimomura shows display equipment (42) for displaying the characteristics of a body such as the quantity of muscle (paragraph 60,64, 87), comprising a plurality of electrodes 21a, 21b, 22a,22c, means for measuring the impedance of the body 20, means for putting the personal information 41c and 41d (paragraph 47) into the display unit 42a, means for calculating 45, means for judging the somatotypes of the body Figures 8-10 (paragraph 37, 39-40,42), and display 42. In regard to claim 2, the display 42a displays personal information such as sex and age (paragraph 47). In regard to claim 3, the display equipment 42 includes memory 44.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3736

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimomura in view of Browner (2842135). Shimomura shows a device for measuring muscle weight and determining body type of a user including current stimulating electrodes 21a, 21b, 22a, and 22b. Shimomura lacks teaching applying a pulsed current through the electrodes for treatment of the body. Browner teaches an electrical body treating device comprising an electrode belt including current stimulating electrodes 11 and 12 for delivering a therapeutic electrical currents to the body tissue to

tone the muscles of the body. The electrode belt may be placed on various muscle groups including stomach, thighs, and back. Therefore it would have been obvious to one having ordinary skill in the art at the time of the invention to modify Shimomura with electrodes that delivered a pulsed current as taught by Browner since such modification would provide treatment and toning to the muscle groups.

### ***Response to Arguments***

6. Applicant's arguments with respect to claim 1-3 and 5-6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

7. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on July 6, 2006 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609.04(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3736

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
